

7th Heaven Cafe: Front-End Design

Objective: Explain and design what the user will see and interact with in the 7th Heaven Cafe web application. This document outlines all major customer and administrative user interfaces, detailed wireframes highlighting text boxes, buttons, dropdowns, tables, navigation elements, search filters, and error/success alerts, followed by comprehensive screen navigation flowcharts.

1. FRONT-END DESIGN

A. User Interfaces / Screens

The system incorporates 13 major screens organized into customer-facing ordering workflows and administrative kitchen operations portals:

1. **Customer Login Screen (/login):** Allows returning customers and staff to authenticate using email/password or Google OAuth, with an option to continue as guest.
2. **Customer Registration Screen (/signup):** Registration interface capturing customer full name, email, 10-digit mobile number, password, and promotional newsletter opt-in.
3. **Home / Brand Landing Page (/):** Hero banner showcasing artisanal beverages, cafe philosophy, operating hours, and prominent "Order Now" call-to-action button.
4. **Menu Catalog & Category Grid:** Interactive menu catalog with category filter tabs (*Hot Coffee, Cold Coffee, Refreshers, Milkshakes, Cupcake Milkshakes, Mug Cakes*), search bar, and dietary badges.
5. **Item Customization Modal / Drawer:** Overlay triggered on item selection allowing customization of milk type (Regular, Oat, Almond, Soy), extra espresso shots, and sweetening preferences.
6. **Slide-Over Cart Drawer:** Real-time persistent cart displaying selected items, unit counters ([-], [+]), customization tags, promo coupon input box, and bill breakdown.
7. **Checkout Screen (/checkout):** Form to specify fulfillment type (Door Delivery, Dine-in, Takeaway Pickup), contact info, delivery address with landmark/pincode, payment selection (Online Razorpay vs Cash on Delivery), and place order button.
8. **Live Order Tracking Screen (/track-order/[orderId]):** Real-time animated 4-stage stepper (*Placed → Preparing → Out for Delivery → Delivered*), live preparation countdown timer, courier details, and itemized invoice modal.
9. **Customer Profile & Order History Drawer:** User profile management showing saved delivery addresses, past order history, digital tax invoices, and 1-click reorder options.
10. **Admin / Kitchen Live Operations Kanban Portal (/admin):** Real-time Kanban board with synchronized order columns (*New Placed, Preparing, Dispatched, Delivered*), audio chime alerts, and status advance buttons.
11. **Menu & Inventory Management Portal:** Administrative screen to add new products, edit pricing/descriptions, and toggle real-time item stock availability (`inStock: true/false`).
12. **Sales Analytics & Revenue Dashboard:** Visual analytics displaying daily gross revenue, completed ticket volume, average order value (AOV), and top-selling beverages.
13. **Coupons & Promotions Management:** Management screen to configure promotional coupon codes, percentage/flat discounts, minimum order requirements, and expiry dates.

B. Screen Design (Rough UI Wireframes)

For all important screens in the system, the wireframes below illustrate input text boxes, buttons, dropdowns, tables, navigation headers, search bars, and alert messages.
